**Github** <https://github.com/Raghu0024>

As a React.js intern, I specialize in crafting engaging and responsive front-end solutions. I bring a blend of creativity and technical acumen to every project, contributing to the development of user-centric interfaces. My work involves leveraging React.js to build modular and scalable components, ensuring seamless interactions and optimal user experiences. Through collaboration, adaptability, and a commitment to growth, I contribute to the success of dynamic teams and the achievement of project goals.

## Projects

### Nxt Trendz ( ECommerce Clone - Amazon, Flipkart)

**Technologies used :** React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication Created a modern e-commerce experience with a design inspired by Amazon and Flipkart.

- Implemented pages for Login, Products, and Product details with React Router, React components, and form inputs.
- Secured user data with JWT tokens, REST API calls, and local storage.

**Demo:** <https://RaghuNxtTrendz.ccbp.tech>

**User credentials :** username: rahul  
password: rahul@2021

### Nxt Watch

**Technologies used :** React JS, JavaScript, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication. Created the Nxt Watch app, a YouTube alternative allowing users to log in, browse video categories such as Trending and Gaming, view saved videos, and search for specific content with a customizable theme.

- Designed interactive pages, including Login, Home, Trending, Gaming, and Saved videos, using React components, state management, and lists.
- Implemented a secure login system with username/password input, followed by API calls and JWT token handling for persistent login states.
- Utilised React Router components (Route, Switch, Link) to establish distinct routes for various pages, enforcing authentication through protected routes.

**Demo:** <https://raghusnxtwatch.ccbp.tech>

**User credentials :** username: rahul  
password: rahul@2021

## Jobby App

**Technologies used :** React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication Brought to life an all-encompassing job search platform, Jobby App.

- Created pages for Login, Home, Jobs, and Job item details with React components, form inputs, and event handlers.
- Secured user information with JWT tokens, REST API calls, and local storage.
- Utilized React Router for protected routes and persisted login state.

**Demo:** <https://raghusjobbyapp.ccbp.tech>

**User credentials :** username: rahul  
password: rahul@2021

## Skills

React JS	<div><div></div></div> Intermediate
SQLite3	<div><div></div></div> Upper intermediate
Node JS	<div><div></div></div> Intermediate
Express JS	<div><div></div></div> Intermediate
Python	<div><div></div></div> Intermediate
Java Script	<div><div></div></div> Intermediate

## Professional Experience

2021-10 - Current

### Intern

*Nxt Wave, Hyderabad*

- **React.js Proficiency:** As a React.js intern, I bring strong proficiency in developing and implementing React components, ensuring the creation of modular, reusable, and efficient code. This includes a deep understanding of state management, component lifecycle, and React hooks.
- **User-Centric Approach:** My work revolves around prioritizing the end-user experience. I am dedicated to creating visually appealing and intuitive interfaces that enhance usability. By incorporating design principles and responsive web development techniques, I contribute to a positive and engaging user journey

## Education

2020-06 - 2022-10

### Masters of Computer Applications: Computer Applications

*Dravidian University - Kuppam*
